Skills

Front-end

- ReactJS
- NextJS
- VueJS
- NuxtJS
- Shadcn
- TailwindCSS
- JavaScript
- TypeScript
- MUI
- Ant Design

Back-end

- ExpressJS
- NestJS
- ElysiaJS
- SQL
- PostgreSQL
- MySQL
- Supabase
- Golang

Tools

- VSCode
- Docker
- ChatGPT
- Swagger
- Postman
- DBeaiver
- Git
- Figma
- Notion
- Window
- MacOS
- Jenkins

Soft Skill

- Communication
- Decision Making
- Creativity
- Time Management
- Problem Solving
- Teamwork

Interested In

- Cryptocurrency
- New Innovation
- FPS Shooting Game
- Manga
- Novel
- Anime
- Animals

About Me

I started learning web development in 2022, beginning with projects using pure HTML/CSS from YouTube tutorials. Later, I explored frameworks to improve both front-end and back-end development, including building APIs with Golang. Now, with 2 years 10 months of experience, I'm able to take a website from its initial structure all the way to production deployment.

In the future, I plan to study more to improve my skills, such as developing APIs in Rust, Automated Testing, creating cryptocurrencies, cyber security for Penetration Testing and experimenting as a white hat hacker, and developing soft skills to become a project manager. Of course, all of these are part of my plans to do in my free time.

Personal Information

Nickname:

Ize

Age:

24 years

Date of birth:

17 June 2001

Nationality:

Thai

Height:

160 cm

Weight:

49 kg

Language

- Thai
- English (intermediate)

Featured Project

View all projects

Portfolio Website

A personal portfolio website built with Nuxt.js and TailwindCSS, showcasing my projects and skills, following my best practices for clean and efficient code.

NuxtJS

View Project

ElysiaJS API for Portfolio

An API for a portfolio website built with Elysia and use TypeScript, created as a learning project to practice API development.

TypeScript

Work Experience

Full Stack Developer  
Soilfish Co., Ltd.

2023 - Present (2 year 3 months)

After graduation, this is the first company I worked for. I learned new frameworks, developed my skills, knowledge and tools for web development. My skills improved greatly because I had a good team to consult with. So far, I have done 2 projects and 4 maintenance projects. I mostly develop front-end.

Back-End Developer (Internship)  
AI Technovation Co.,Ltd.

2022 - 2023 (6 months)

I have to take the requirements from the client, design and develop the backend system using Golang language and PostgreSQL database. Sometimes I will help to develop the frontend system using Nuxt.js as a framework. The project I am involved in developing is a healthcare system.
